Egyptian Olympiad in Informatics (EOI).

Preparatory division in C++

SUMMARY

Computer Science student who loves to discover new things and meet new people. Gained problem-solving skills using C++. Worked on projects in C++, Java, and NodeJS. Seeking an internship that offers a great opportunity to discover new technologies and get engaged with experts.

EXPERIENCE

Cashier, Spinneys Egypt

August 2024 – September 2024

- Handled over 150 customers daily.
- Consistently maintained perfect attendance, showcasing reliability and a strong work ethic.

Back-End Intern, nandbox

February 2024 – June 2024

- Developed a video call widget for the web to make calls with the nandbox mobile application using WebRTC with JavaScript.
- Integrated ChatGPT into the nandbox messenger app using OpenAI API with Java and SQLite database to store conversations so the user can continue the previous chats.

PROJECTS

Baby Photoshop

April 2024

- Baby Photoshop is a C++ program created by Qt that applies 20 filters to photos using image processing libraries.
- Designed and created the User Interface for the program using Qt Style Sheet.
- Implemented 6 image filters such as image resizing, and image crop.
- Video demo: https://youtu.be/QpGuzryZ7Sc
